

---

The instrumentation books by Aftab Ahmed Mazari are the best books to learn about instruments. These books help students learn about some of the most important instruments. It helps students learn how to use them and how they work. This series is designed with smaller text so kids can easily read it. Aftab Ahmed Mazari is an expert in his field of engineering and has a highly successful career he continues today at a very old age of 93 years old, even so, he continues his educational pursuits late into the night late into the night to share his expertise with others who have come from all over America for this program. Aftab Ahmed Mazari has also written several other books on topics ranging from science, math, religion to advanced engineering topics. He is a self-taught author with strong belief of introducing the topic of Islam through Science. He has an interest in Physics, Mathematics, Mechanics and Fluid Dynamics. He has written many successive books of his own on these topics which are extremely useful for any one who is serious about the disciplines. His books are popular among students who are preparing for competitive examinations or getting higher degrees in these fields. Aftab Ahmed Mazari is known to present the subjects of Mechanics and Fluid Dynamics without making it too complex for students. In this series of books, he has tried to present the subjects in readers' interest. He has been a keen learner in all these subjects himself and it shows in these books. Some of his books in this series are: These books introduce the reader to a wide range of topics, from Mathematics and Science to Engineering and Mechanics. These books are not only useful for young children but also useful for students who are taking any competitive examinations or preparing for any postgraduate course. These books will help the students learn everything from basic facts about Physics and Fluid Dynamics to more advanced topics such as Non-linear Convection & Diffusion, Computational Methods, Laplace Transform Methods etc. His books on mathematics and science are very useful for children. The books are written in a very simple language and the graphics and diagrams used in the books make it easier for kids to understand what they read. Mr. Mazari has been teaching in this area for more than eighty years, he is one of the most successful teachers of his time and has trained many students who have become professionals themselves in their fields. He is also an author of several publications on his subjects such as Mechanics, Fluid Dynamics and Computational Methods, which are widely used by students preparing for competitive examinations or pursuing higher studies.
